

Scenario Immersion Training System

SMOKE & SOUND

- Firefighter Survival & Mayday Training
- Rapid Intervention Team (RIT) Operations
- Search & Rescue Operations
- Structure Fire Simulations
- EMS & Mass Casualty Incident (MCI) Exercises

Scenario Immersion & Stress Innoculation

Scenario Immersion Training System

Real emergencies are loud, chaotic, disorienting, and stressful. Yet many training evolutions occur in controlled environments that fail to replicate the sensory overload firefighters encounter on the fireground.

The Scenario Immersion Training System combines realistic smoke simulation, dynamic incident audio, and wireless instructor control to create immersive training environments that challenge firefighters to think, communicate, and perform under pressure.

Training Applications

- **Firefighter Survival & Mayday Training**
- **Rapid Intervention Team (RIT) Operations**
- **Search & Rescue Operations**
- **Structure Fire Simulations**
- **EMS & Mass Casualty Incident (MCI) Exercises**
- **Low-Visibility Navigation Training**
- **Incident Command System (ICS) Exercises**

Package Includes

- **Universal Wireless Remote**
- **SIM-SMK-6**
 - 6M Wireless Receiver
 - Hard Case
- **Chaos Box**
 - Audio Box Receiver
 - 12" Wireless Speaker
 - Wireless Microphone
 - Tripod
 - 2 x Battery
 - Hard Case

Whether conducting Rapid Intervention Team (RIT) operations, firefighter survival drills, search and rescue scenarios, recruit academy evolutions, or command-level exercises, instructors can rapidly introduce realistic environmental conditions that increase engagement, improve decision-making, and better prepare personnel for real-world incidents.

OPCON Wireless Remote

Universal Firing System

ONE REMOTE TO RULE THEM ALL!

The OPCON Wireless Remote provides instructors with centralized control of smoke, sound, and scenario effects from a safe stand-off distance. **Capable of activating up to 600 devices simultaneously**, the wireless remote allows complex training scenarios to be executed with precise timing and minimal manpower.

The CHAOS Box /

Wireless PA System

The Chaos Box delivers realistic incident audio and environmental sound effects to increase immersion and stress during training. From mayday calls and PASS alarms to fireground communications and victim sounds, the system helps create dynamic, realistic training environments that challenge communication, situational awareness, and decision-making under pressure.

- **Realistic Incident Audio Effects** – Simulate mayday calls, PASS alarms, victim sounds, fireground communications, and environmental distractions.
- **Wireless & Rapidly Deployable** – Set up realistic scenario audio in minutes without running cables or requiring external infrastructure.
- **Enhances Stress Inoculation Training** – Challenges communication, situational awareness, and decision-making in dynamic training environments.

SIM-SMK-6 | Wireless Smoke Initiator

The SIM-SMK-6 provides instructors with a reliable, flexible smoke simulation capability that can be deployed across a wide range of training environments. Designed for rapid setup and minimal maintenance, the system allows departments to add realistic environmental conditions to routine drills, large-scale exercises, and specialized training evolutions without the limitations of traditional fog machines.

- **Dense, Realistic Smoke Production** – Rapidly fills structures with long-lasting smoke that behaves and looks like real smoke.
- **Wireless Remote Activation** – Deploy smoke exactly when and where it is needed with instructor-controlled initiation.
- **Burn & No-Burn Compatible** – Safe for use in both live-fire training environments and non-burn training scenarios.

Smoke Cannisters

OPCON Smoke Canisters produce dense, non-toxic, cold smoke that creates realistic training conditions without leaving oily residue on personnel, equipment, or facilities. Designed for safe use in a wide range of training environments, they provide reliable visual obscuration and scenario realism while maintaining a clean and easy post-training cleanup. **Available in multiple colors.**
